PRICE'S LAWN GRASS

The best time to start your lawn, or to repair it, is during the cool weather of early Spring or in early Fall. The weather at these times is favorable for the development of domestic grass but unfavorable for most weeds and wild annual grasses. On new lawns, use 1 lb. for every 300 square feet, 5 lbs. for 1500 square feet, 135 to 150 lbs. for one acre. To replenish lawns where turf is thin, use half quantity.

Price's SPECIAL Lawn Seed

Lb. \$1.50 5 lbs. \$7.00 25 lbs. \$32.50 50 lbs. \$60.00

This mixture is especially prepared from the highest quality seeds that can be produced. It makes a smooth, green, velvety lawn with a thick bottom, free from clumps. Only the very best fine-leaved and deep-rooted varieties of the most suitable grasses for making an even, thick mass of sod are used in this mixture. Sure to produce the best results under average conditions of soil and climate.

Price's 'Capitol Park' Formula

Lb. \$1.25 5 lbs. \$5.75 25 lbs. \$26.25 50 lbs. \$47.50

This mixture is composed of fine, recleaned grasses and white clover, carefully proportioned so that they succeed one another throughout the Summer. Where low cost and quality is important we have prepared this mixture to meet your budget.

Price's Dense Shade Formula

Lb. \$1.65 5 lbs. \$7.95 25 lbs. \$37.50 50 lbs. \$70.00

An exceptional formula which is particularly adapted to heavily shaded areas and will also do well in lighter shade. We have spared no care or expense to make this lawn seed the best obtainable for the purpose. Does not contain clover.

Merion Blue Grass Formula

100% Perennial Grasses Lb. \$1.98

STRAIGHT MERION BLUE GRASS Lb. \$2.29

Produces thicker turf, stays greener all Summer and stands closest mowing. One pound covers 750 square feet, three times as much as standard Blue Grass, costing no more to sow an equal area.

SEPARATE VARIETIES OF GRASSES MOST SUITABLE FOR LAWNS

WHITE DUTCH CLOVER. Gardeners who prefer an extra heavy growth of clover in their lawn should add this at the rate of 4 ozs. to every 2 lbs. of grass seed.

¼ lb. 50c., ½ lb. 90c., 1 lb. \$1.50

WILD WHITE CLOVER. This is the ideal clover for lawns. When kept cut, it shows hardly any blossoms and its low creeping habit of growth means that your lawn will remain green all Summer.

½ lb. \$1.00, 1 lb. \$1.85

FANCY KENTUCKY BLUE GRASS. An ideal lawn grass, slightly creeping in habit, fine texture and permanent, improves each year. Prefers retentive, strong soils with moisture.

1 lb. \$1.25, 10 lbs. \$11.50

FANCY RED TOP. A fine perennial grass with slightly creeping habits of growth. Stands hot weather and hard usage. Fills in well with Blue Grass.

Lb. \$1.00, 10 lbs. \$9.50

CHEWING FESCUE. A New Zealand grown strain of red or creeping fescue. A creeping rooted grass resisting extreme drought and especially adapted for forming close and lasting turf in shady places.

Lb. 90c., 10 lbs. \$8.50

CREEPING RED FESCUE. It spreads from the roots, making a dense turf which tends to crowd out weeds. Does well in shade and is good on sandy soil.

Lb. 90c., 10 lbs. \$8.50

PENNLAWN FESCUE. Developed at Penn. Agricultural Experiment Sta. Tolerates dry soil in either shade or sun. Withstands close mowing. Creeping habit.

Lb. \$1.15, 5 lbs. \$5.50

SEASIDE BENT (Certified). Suitable for putting greens.

Lb. \$2.25

WRITE OR PHONE US FOR ANY ITEM NOT LISTED IN THIS CATALOG. WE CARRY MANY ITEMS THAT WE COULD NOT LIST. ASK US ABOUT THEM FIRST.

Our list of varieties includes the choicest strains of all the best standard sorts but we recommend making thorough trials of our many new varieties because they have proved superior in many sections. Higher yields, better quality and disease resistance are important factors that distinguish many of the newer varieties.

GENERAL INFORMATION AND TERMS OF SALE

Our seeds are all tested for germination and the results of these tests are shown on each package. If interested in knowing germination before buying, write us.

The number of days indicated to produce vegetables ready for table use will, of course, vary from year to year, depending on seasonal conditions. Size and quality are also influenced, although probably to a less extent, by conditions of growth and geographical location. The data given is based on average performance rather than on behavior under the most favorable conditions.

Price's Seed Store, Inc., warrants to the extent of the purchase price that seeds and bulbs sold are as described on the container within recognized tolerances. Seller gives no other or further warranty, expressed or implied. We will not fill, or accept, orders under any other conditions.

**GUARANTEED TO GROW, BLOOM
AND BEAR**

Yes, Sonjana is a real strawberry but it is entirely different from any that has ever before been seen in America. For Sonjana is really a handsome ornamental which will beautify your garden from spring until late fall. Unlike the ordinary strawberry, the runners it sends out do not have to be rooted in the soil. Trained on trellis, fence or wall these sturdy stems form dozens of rosettes, which bear a profusion of blossoms and berries. The result is a strikingly beautiful mass of deep green foliage, accented by charming white flowers, bright green berries and rich red delicious fruit all at the same time. Sonjana is a new true ornamental, unlike anything ever seen before in the gardens of America.
